

iOS-UI-DataBinding-Developer-test

This application is showing Car Wash Visit List as per dates. Created with MVVM UDesign pattern,

For mvvm bindings we are not using any third party instead we have written our own class.

As we have only static data so I have made changes in dates, please select 1st, 2nd and 3rd July to see results.

Libraries used

No third party library Used

#Assumptions

For now I am assuming all data is loaded from a single JSON

Notes

I have added unit test cases and Code Coverage is more than 72% over All. And for the ViewModels it is more than 96 %.

Added screenshot in the folder.
